March 12, 2009

Dear Emery Families,

I am excited to announce that on May 27th and May 28, 2009, Emery USD will be conducting the California Healthy Kids Survey (CHKS). Students in the fifth, seventh, ninth, and eleventh grades will be participating. The survey will be administered during one class period, and will most likely take one hour to complete. This survey will ask questions of students related to school climate, health, and wellness. This survey will help us to assess our success in meeting the goals of our guiding principles, and will also inform health and prevention programs that can enhance our school environment.

Information collected through this survey has shown that school climate factors and student connectedness are related to changes in academic performance and test scores over time. This analysis supports the importance of promoting a positive school climate — and of reducing involvement in risk behaviors — as part of any comprehensive school improvement effort.

The CHKS is rooted in the recognition that improvements in academic achievement and learning cannot occur without addressing the health and behavioral risks that confront our youth and establishing environments that support learning and positive youth development. The first step in achieving this goal is obtaining data to guide program development and decision-making. The survey provides data on fundamental learning supports and barriers, and collects additional information to guide these efforts. Local benefits include:

- Assessing, understanding, and responding to youth health risks and their influences;
- Laying the foundation for student success;
- Complying with categorical program requirements, and obtaining new funding;
- Identifying prevention and health program goals;
- Evaluating program success in meeting goals;
- Fostering a comprehensive health program;
- Fostering parent-community awareness and collaboration; and
- Assessing assets/resilience and promoting positive youth development.

The results of the climate survey will assist us in ongoing improvements of programs that support positive character development among all students. The survey includes questions that assess:

- The current climate of the school and its community with regards to youth development;
- The scope of prevention efforts and health services, including school-community collaboration and availability of resources.
- Degree of potential substance use and abuse and other risk-taking behavior and how it may impact both learning and the school in general;
- The nature, communication, and effectiveness of school policies and procedures

To view the complete survey yourself, you can visit:

http://www.wested.org/cs/chks/view/chks_s/17?x-layout=surveys online or you can go to the district office, where a hard copy of surveys will be available for you to view in the CHKS binder.

To preserve anonymity, results will be presented in tables that combine answers from all staff in all grades according to the district school configuration (i.e., by elementary, middle school, high school) and by individual school.

We thank you and your students for your cooperation in helping us to make Emery USD a stronger learning environment. Any questions you may have can be directed to Lauren La Plante, who can be reached at 510-601-4749.

Sincerely,

Superintendent

Deputy Superintendent

Emery Secondary Principal

Anna Yates Principal

Wellness Director

Student Services Director

School Psychologist

Public Information Officer

**CONSENT FOR THE CALIFORNIA HEALTHY KIDS SURVEY
2008-2009 SCHOOL YEAR**

Dear Parent or Guardian,

Your child is being asked to be a part of our school's Healthy Kids Survey sponsored by the California Department of Education. This is a very important survey that will help promote better health among our youth and combat problems such as drug abuse and violence. *Your child does not have to take the survey. Participation is voluntary and requires your permission.*

Survey Content. The survey gathers information on behaviors such as physical activity and nutritional habits; alcohol, tobacco, and other drug use; school safety; and environmental and individual strengths and assets. You may examine the questionnaire in the district office or at your district's website at www.emeryusd.org.

It is Voluntary. Students who agree to participate with your permission only have to answer the questions they want to answer and they may stop taking it at any time.

It is Anonymous. No names are recorded or attached to the survey forms or data. The results will be made available for analysis only under strict confidentiality controls.

Administration. The survey will be administered on May 27th, 2009. It will take about one class period to complete (about 50 minutes) and will be administered in your child's regular 5th grade class.

Potential Risks. There are no known risks of physical harm to your child. Risks of psychological or social harm are very small. None have been reported in seven years of survey administration. In rare instances, some discomfort might be experienced from the questions. The school's counseling services will be available to answer any personal questions that may materialize.

For Further Information. The survey was developed by WestEd, a public, non-profit educational institution. If you have any questions about this survey, or about your rights, call Lauren La Plante at 510-601-4749.

CHKS Parent Consent Form

Please check below whether you grant permission, sign, and return this form to the teacher who distributed it within three days:

I *give permission* for my child to be in the Healthy Kids Survey.

I *do not give permission* for my child to be in the Healthy Kids Survey.

Signature: _____ Date: _____

My child's name is: _____

(Please Print)

THANK YOU FOR COMPLETING AND RETURNING THIS CONSENT!!!
